**Subject:** Election Identification Certificate (EIC) Operations Next Week

Sir,

I apologize for the short notice, but I wanted you to know that DPS/DL has been directed by the Secretary of State (SOS) to conduct EIC operations outside of "brick-and-mortar" offices in El Paso beginning the 1<sup>st</sup> of Oct. To this end, SOS has purchased enough equipment (computers, scanners, cameras...) to build 25 "Mobile Light" systems for use in issuing EICs only. Region 4 will receive four of the twenty-five systems (see attachment). IT has configured these computers to protect the PII of the customers and we (DL) developed a business model for our employees to use. Because of security reasons, these units do not have internet access and our employees will not be able to verify customer eligibility on site. In order to overcome this, AD Skylor Hearn has determined that our personnel can use the Regional Communications Centers to run a 10-27 on the applicants to verify their eligibility to receive an EIC (we will not run a warrant check). We have loaded all six regional numbers into the cell phones that are included in the kits.

The SOS has worked to develop a list of locations in El Paso for DL to set up EIC operations. These are shown on the chart below. We have asked Dave Barber to check the locations out, and while employees at each of them have indicated that they were notified of our coming, the requirements were not spelled out (SOS told them we only needed a parking spot, not a table, chairs and access to power). I believe that Dave has resolved this with the POC at each location, and AD Peters is working this out with SOS today to make sure that we have everything we need in the future.

While some technical issues remain, we are planning to issue the equipment tomorrow and train our personnel to use the systems.
